- Worked closely with global customers spanning to troubleshoot client issues

PROJECTS

ABS Freedom, LTIMindtree

WorkApp Freedom is a web and Windows application for the American Bureau of Shipping (ABS), a classification society for marine and offshore assets. The application is used by surveyors to track work orders and includes multiple modules such as engineering comments, invoice request forms (IRF), certificates, timecards, and around 30 other operational modules.

- **Front-End Development:** Utilised HTML, CSS, JavaScript, React.js, and Redux Thunk to build a responsive user interface & several other plugins like react-vtree
- **Windows Application:** Employed Apache Cordova for cross-platform Windows application development.
- **Project Management:** Used JIRA and Kanban for planning and tracking project tickets.
- **Version Control:** Used Git for code centralization and team collaboration.
- **UI Framework:** Semantic UI React.

Dentsu Plan Manager, Successive Digital

A web application for DAN brands (e.g., BMW, Kraft Heinz) to manage advertisement campaigns across digital, radio, and print channels. Each campaign plan is budgeted by clients to target specific markets.

- **Authentication:** Implemented JWT tokens for secure user authentication.
- **Microservices Architecture:** Contributed to a scalable and modular application structure.
- **Routing:** Utilised React Router for efficient navigation between components.
- **Front-End Development:** Built a responsive UI using React.js and JavaScript.
- **Server-Side Integration:** Worked with Apollo GraphQL, Node.js, and Express.js.
- **Database Management:** Integrated MongoDB for data storage.
- **Version Control:** Used Git for code centralization and team collaboration.
- **UI Framework:** Leveraged an in-house component library by Dentsu for creating reusable UI components.

Mashups/Charts, SDG Corporation

Developed visual representations of internal web-based GE Form data using various chart types, including column, pie, bubble, stacked area, line charts, and threshold tables.

- **Data Visualization:** Created interactive and informative charts to represent database information using library Highcharts and Chart.js
- **Project Management:** Utilised JIRA to plan and track project tasks and tickets.
- **Version Control:** Managed source code with SourceTree and Git.
- **Front-End Development:** HTML, CSS, JavaScript, and Angular.js 1.x for building and maintaining the user interface.

EDUCATION

Noida Institute Of Engineering & Technology (NIET)

Bachelor Of Technology: Information Technology

Greater Noida, India

April, 2012-May, 2016

Netaji Defence Academy

Senior Secondary Education

Maharajganj, India

April, 2009-July, 2017

Holy Cross School

High School

Nautanwa, India

April, 2005-March, 2009

CERTIFICATIONS

- Certification of Appreciation Award for doing research & optimization of module
- AWS Certified Cloud Practitioner
- AWS Partner: Accreditation (Technical)
- M220JS: MongoDB for Javascript Developers
